

# RACKMAN POST PROTECTORS & DEFLECTORS

Rackman Australia's Post Protectors and Deflectors provide protection where you need it most, prolonging the life of your warehouse storage system from forklift or vehicle related damage

They save money for post repairs and reduce floor damage by absorbing impact energy without protruding into the safe working clearances and features:

- A fast installation at low cost using cable ties to attach to rack uprights
- Finished in vibrant colours to promote safer operating within the space
- Certified to impact loads in AS4084-2012
- A slim-line design constructed from high quality materials which are available in several widths to suit different manufacturers' uprights
